IMPACTITES 4

Sample #	Rock type	Crater setting	Description	Origin
1	Impact melt rock	Proximal ejecta	Vesicular, clast-free impact melt rock	Mistastin impact structure
2	Lithic impact breccia	Proximal ejecta	Polymict, lithic impact breccia	Mistastin impact structure
3	Impact melt rock	Crater-fill	Clast-rich impact melt rock; matrix is carbonate melt and silicate glass, clasts are mostly carbonate	Haughton impact structure
4	Gniess (unshocked)	Outside crater	Unshocked Precambrian shield, 80 km from outside crater	Haughton impact structure
5	Granophyre	Crater-fill	Coarse-grained, clast-free impact melt rock	Sudbury impact structure
6	Impact melt rock	Proximal ejecta	Hydrothermally altered impact melt rock	Mistastin impact structure
7	Impact melt-bearing breccia	Proximal ejecta	Polymict, melt-bearing impact breccia	Ries impact structure
8	Gniess (shocked)	Crater-fill	Clast from impact melt rock	Haughton impact structure
9	Shatter cone	Central uplift	Shatter cone in dolomite	Haughton impact structure
10	Tektite	Distal ejecta	Glassy tektite	Muong-nong tektite strewn field
11	Tektite	Distal ejecta	Glassy tektite	Muong-nong tektite strewn field
